

# THOMAS ALEXANDRE LANGLOIS, PhD

tal22@mit.edu ◇ 202-459-8772 ◇ [Website](#) ◇ [LinkedIn](#)

## PROFESSIONAL EXPERIENCE

---

**Massachusetts Institute of Technology (MIT), Brain and Cognitive Sciences (BCS)** Cambridge, MA

Postdoctoral Associate (and visiting scholar at NYU Department of Psychology) 09/2024 — Present

- Implemented **information theoretic models** and quantitative analyses for **natural language processing** tasks
- Modeled efficient compression in human verb and noun usage using the **Information Bottleneck Principle (IB)**
- Designed, developed and deployed **large-scale web applications** for crowdsourcing human annotations over **Prolific**
- Published research findings in the **Proceedings of the Cognitive Sciences Society**.

**University of Texas at Austin, Center for Perceptual Systems (CPS)** Austin, TX

Research Affiliate Postdoctoral Fellow 02/2023 — 09/2024

- Investigated how **visuomotor neurons** in the primate brain integrate sensory information with prior expectations
- Developed **Bayesian models** of non-human primate behavioral and neural response data
- Developed **drift diffusion models (DDMs)** of evidence accumulation in neural spiking activity in PFC
- Published research findings in the **Proceedings of the National Academy of Sciences (PNAS)** [[PNAS 2025](#)]

**Princeton University, Department of Computer Science** Princeton, New Jersey

Postdoctoral Research Associate 08/2018 — 02/2023

- Developed **Bayesian computational models** of perceptual inference and memory using **efficient coding theory**
- Designed, developed and deployed **large-scale web applications** investigating visual memory in over 10,000 subjects
- Built and evaluated computer vision **neural network models** to compare human visual selectivity to machine attention
- Presented findings in **Neural Information Processing Systems (NeurIPS)** as an oral presentation. [[NeurIPS 2021](#)]
- Published research findings in the **Proceedings of the National Academy of Sciences (PNAS)** [[PNAS 2021](#)]
- Published work in **ICML** [[ICML 2023](#)], and the **Proceedings of the Cognitive Sciences Society** [[CogSci 2019](#)]

## EDUCATION

---

**UC Berkeley, Department of Psychology (Cognition, Brain, & Behavior Program)** Berkeley, CA

PhD, Psychology (Cognition Track) 08/2018

**UC Berkeley, Electrical Engineering and Computer Sciences (EECS)** Berkeley, CA

MS, Computer Science 08/2018

**Georgetown University, College of Arts & Sciences** Washington, DC

BA, Psychology (Cognitive Science) & BA Studio Art and Art History 08/2008

## TECHNICAL SKILLS

---

**MATLAB, R** (Simulations, statistical modeling, analysis, data visualization)

**Python** (Data science, machine learning, data visualization)

**Tensorflow, Pytorch, Keras** (neural network design, training, evaluation)

**Git** (Version control)

## AREAS OF EXPERTISE

---

**Bayesian models of cognition:** Ideal observer models, efficient coding theory, the Information Bottleneck (IB) principle. **Data analysis** Signal detection theory, neural data analysis, generalized linear models (GLMs).

**Neural Networks** VAEs, CNNs, LLMs
